SHAPE

DUCKOUT is a Swiss-army knife of sidechain plug-ins, offering a streamlined layout to create the space you want for any vocal or instrument using intuitive and intelligent sidechain algorithms with minimal effort.

Designed for producers, Duckout offers you two types of sidechain concepts with added built-in intelligence:

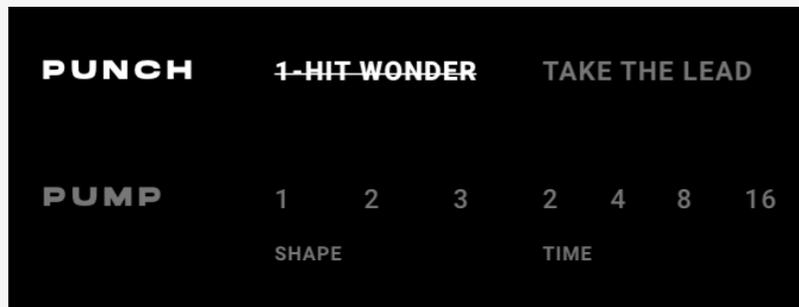

1. Easily get two clashing sounds to fit together in a mix by “ducking” one from the other. Duckout will also “listen” to the sidechain input and apply an intelligent EQ to help your sounds fit perfectly in the mix.
2. Achieve an instant ducking effect to simulate sidechain compression, saving you the need to route the kick (or hi-hat) track to the sidechain input of a compressor.

PRESET SELECTION

CONTROLS
GAIN & MIX

Duckout is built on an easy-to-use framework split into 3 sections.

PUNCH - Sidechain Compression + Intelligent EQ that listens and adapts to the sidechain input on the plugin.

- **1-Hit Wonder** - Helps percussive instruments stand out from other clashing elements.
- **Take the Lead** - Highlight any vocal or instrument to take the lead and shine through the mix.

PUMP - Is a gain reduction processor modulated by selectable internal LFO shapes with time adjustments.

- **Shape** - Choose between 3 shapes:
 - **1** - Create the “pumping” effect that is usually achieved by feeding a bass drum into the sidechain of a mix, buss or an individual channel’s compressor.
 - **2** - Add a “wavy” pulse to your signal.
 - **3** - Add a random modulated pump and create unique pulses to your sound..
- **Time** - Using this menu, you can synchronize the internal LFO at various intervals, not only at the usual quarter-bar interval. This makes Duckout a tool with endless creative possibilities, such as rapid gating effects.

COMPATIBILITY

Plugin formats: VST3, AU.

Platforms supported: Mac OS 10.7 and up including Catalina. PC Windows 7 and up.

DAWs supported: Ableton Live, Logic Pro, FL Studio, Cubase, Nuendo, Reaper, Reason and most other major DAWs on the market.

INSTALLATION

A software download is supplied with your purchase. You will receive emails for the latest software updates.

After downloading, unzip the file and select either Mac or PC depending on your system. (Warning: don't run the PC file on a Mac and vice-versa).

MAC: Double click on the PKG installer and follow the instructions.

PC/WINDOWS: Double click on the setup file and follow the instructions.

ACTIVATION

Activate your software by entering the serial key that was emailed to you when you bought the product. Serial keys are entered in when you first load the plugin. If you have any problems activating, please email support@imamusicmogul.com.

UNINSTALL LOCATIONS

MAC OS

AU: /Library/Audio/Plug-ins/Components

VST3: /Library/Audio/Plug-ins/VST3/

WINDOWS

VST3: /Program Files/Common Files/VST3/
